

NACHI-FUJIKOSHI was founded as a tool manufacturer in Toyoma City in December 1928. In 10 years the company started up its own steelmaking plant with complete technological production cycle from raw materials to finished goods.

From this point on the company has developed to produce tools and bearings from high-quality raw materials of their own. The core principle of company development was shaped in a motto: "We want everything we make to be of the highest level of Mastership". At present the company has a vast experience, which has no world analogues, in producing such products as tools, bearings, robots, hydraulic equipment and materials. It plays a significant part in creating new technologies, advancing production level and accumulating unique know-how.

The corporation has its own engineering developments in various domains, including special steels with specific properties, heat and mechanical treatment techniques, as well as production of completing parts. By employing the diversity of its activities the company holds a solid position in the sphere of manufacturing.

Nachi Products Range

- . Deep Groove Ball Bearings
- . Angular Contact Ball Bearings
- . Cylindrical Roller Ball Bearings
- . Spherical Roller Bearings
- . Spherical Roller Thrust Bearings
- . Thrust Ball Bearings
- . Precision Machine Tool Bearings
- . Sheave Bearings

SPHERICAL ROLLER BEARINGS

BEARINGS FOR ROLLING STOCKS

SHEAVE BEARINGS

Nachi Automobiles & Automotive Parts

TRANSMISSION BEARINGS

CLUTCH RELEASE BEARINGS

AIR-CON CLUTCH BEARINGS

CVJ JOINT ROLLER BEARINGS

STEERING WHEEL BEARINGS

Motorcycle Applications

DEEP GROOVE BALL BEARINGS

DOUBLE ROW ANGULAR CONTACT BEARINGS FOR AUTOMOTIVE AIR-CONDITIONER
